DETAILED ACTION

Response to Applicant's election

Applicant's election filed on 3/13/2006 to elect Group II , claims 11-15 for continue prosecution of the application, has been considered and enter. Only claims 11-15 are prosecuting at this present time.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Cellier et al (USP 5,884,269).

Regarding claim 11, Cellier discloses a method that teaches processing digital signal by use of a tap number of prediction order dependent only on usable samples in a frame without using samples preceding a first sample of the frame succeeding a last sample of said frame (see col. 4).

Regarding claim 13, Cellier teaches FIR filter processing (see col. 4).

Regarding claim 14, Cellier teaches autoregressive linear prediction error generating processing (see col. 4).

Allowable Subject Matter

Claims 12 and 15 are objected to as being dependent upon a rejected base claim, but they would be considered for allowable if they are rewritten in independent form including all of the limitations of the base claim and any intervening claims. Features of objected claims are not taught or suggested by the prior art.
